CS6W50 Career Development Learning (CDL) Form

Student

Student Londonmet ID: _____

Student Name: _____

College E-mail ID: _____

Mobile No: _____

Student's work/placement address: _____

Employer

Company Name: _____

Company's Address: _____

Company Supervisor's Name and Position: _____

Company Supervisor's Tel No: _____

Company Supervisor's email address: _____

Career Development Learning Activity

Start Date: _____

End Date (if known): _____

Your role at the placement (position): _____

Brief description of your work at the placement: _____

Proposed learning outcomes from the Career Development Learning Activity:
It is very important that you read the learning agreement guide before filling in this form. You need to list **at least 7 learning** outcomes, and at least **two** learning activity should be closely relevant to the course you are doing at the university.

Learning Outcome ID	**Learning outcomes** By the end of my work placement, I will be able to develop what skills or knowledge: (e. g. develop my XXX skills, enhance my knowledge of XXX)	**Activities and tasks** I will achieve this learning outcome by carrying out what tasks (e. g. participating in a Web development project, or to work in a team, or to engage in group discussion)	**Evidence** Evidence I could use to demonstrate that I have achieved this learning outcome? (e. g. feedback from the employer, artefacts I will develop, screen shots or video capture, meeting minutes)
LO1	I aim to strengthen my C# and .NET development abilities by learning how to build well-structured applications and applying essential programming concepts in real development tasks.	To achieve this, I will work on creating C# programs, apply OOP techniques in practical scenarios, and follow development exercises assigned during my internship.	This outcome will be shown through completed project files, screenshots of working applications, and a record of my weekly development progress
LO2	I intend to improve my understanding of database operations using SQL Server and ADO.NET, especially in performing CRUD functionalities within .NET applications.	I will work on connecting .NET projects to SQL Server, write CRUD operations using ADO.NET classes, and develop a small system that interacts with a database.	The progress will be demonstrated through SQL scripts, working CRUD modules, project documentation, and feedback received from my supervisor.
LO3	I plan to enhance my knowledge of ORM tools by implementing data operations with Dapper and Entity Framework Core in different project modules.	I will complete tasks involving Dapper queries, EF Core migrations, and model creation while developing small applications that rely on ORM-based data access.	My learning will be confirmed through functional project outputs, migration records, and uploaded code samples showing correct ORM usage.
LO4	I aim to develop stronger skills in MVC architecture by creating structured modules for the Inventory Management System and integrating database operations through EF Core.	I will build controllers, views, and models for different sections of the IMS, design database relationships, and connect the system to SQL Server to support real workflows	This will be reflected through the completed IMS modules, UI screenshots, and the working system demonstrated during project reviews.

LO5	I want to improve my ability to work effectively in a team by collaborating closely with my colleague during system development tasks.	I will do this by sharing workload responsibilities, participating in technical discussions, and coordinating decisions for various project components.	Collaboration will be shown through meeting notes, shared task records, and supervisor observations about my teamwork performance.
LO6	I aim to build stronger time management habits by organising my work schedule and completing internship tasks within planned deadlines.	I will maintain a structured weekly plan, prioritise my assignments, and follow a consistent routine to ensure regular progress by using **Trello** as my time-tracking and task-management application. Application?? (time tracking) Trello, notion, clickup	My improvement will be visible through updated weekly logs, completed tasks submitted on time, and my supervisor's review of my punctuality. Gantt chart, completion SS.
LO7	I seek to enhance my problem-solving abilities by analysing errors in my applications and finding effective ways to fix technical issues.	I will debug code, review error messages, research possible solutions, and adjust my logic to correct mistakes during development.	Evidence of this skill will include corrected code samples, debugging notes, and project updates showing resolved issues.
LO8	I aim to strengthen my professional communication skills by clearly presenting my ideas, sharing progress, and discussing challenges with my supervisor.	I will regularly update my supervisor, ask questions when need, and participate in project discussions to explain my work confidently.	My communication progress will be captured through email updates, meeting summaries, and supervisor feedback. 
			LO9	I intend to improve my critical thinking ability by comparing different data access techniques in .NET and selecting suitable methods for given scenarios.	I will review the strengths and limitations of ADO.NET, Dapper, and EF Core, analyse which tool fits each task, and apply my reasoning in actual project modules.	This will be supported through written reflections, comparison notes, and decisions documented in my project files.
LO10	I want to develop better professional writing skills by producing clear documentation, progress logs, and reports related to my internship tasks.	I will write weekly logs, prepare system documentation for the IMS, and complete formal reports required for the CDL module.	My writing skills will be evidenced through well-structured logs, completed reports, and documentation submitted as part of my internship portfolio.

<u>This form is approved by the CDL academic supervisor</u>

Academic Supervisor Name:

If you work at an external company or organization, the following "Heath and Safety checklist" form must be completed before your placement can be approved.

LONDON METROPOLITAN UNIVERSITY

External Career Development Learning (PLACEMENT) PROVIDER
HEALTH AND SAFETY CHECKLIST

Name of the Placement Provider (Company name):
Placement site Supervisor:
Supervisor's Position:
Address:
Email:
Telephone:

		Yes	No
1	Do you have a written Health & Safety policy?		
2	Do you have a policy regarding health and safety training for people working in your undertaking, including use of vehicles, plant and equipment, and will you provide all necessary health and safety training for the student?		
3	Is the organization registered with? (tick as appropriate) (a) the Health & Safety Executive or (b) the Local Authority Environmental Health Department		
4	**Insurance** (a)Is Employer and Public Liability Insurance which will cover the duration of the placement? (b) Employer and Public Liability Insurance policy number _____ (c)Will your insurance cover any liability incurred by a placement student as a result of his/her duties as an employee?		
5	**Risk Assessment** (a)Have you carried out any risk assessment of your work practices to identify possible risks whether to your own employees or to others within your undertaking? (b)Are risk assessments kept under regular review? (c)Are the results of risk assessment implemented?		
6	**Accidents and Incidents** (a)Is there a formal procedure for reporting and recording accidents and incidents in accordance with RIDDOR (Reporting of Injuries, Disease & Dangerous Occurrence Regulations)? (b)Have you procedures to be followed in the event of serious and imminent danger to people at work in your undertaking? (c)Will you report to the university all recorded accidents involving placement students? (d)Will you report to the university any sickness involving placement students which may be attributable to the work.		

The above statements are true to the best of my knowledge and belief.
